

Solus Canteen

Management System

Introduction

Solus Canteen Management is a KIOSK based system which automates the canteen facilities in an organization. It creates a transparency between the Canteen vendor and the Employees of an organization. It also eliminates the necessity of physical cash reconciliation completely. The Solus Canteen Management System is designed in such a way that it simplifies all the canteen related process, facilitating quick and efficient operations to cover a larger section of employees within a specified time.

Features & Benefits

Canteen Management

Manages multiple canteen units like Food vendors, Food events with timings, Vendor wise Food counters with reader configuration for each counter, Food items with quantity limit, price and subsidies.

Menu Management

Vendors can create menus with price details

Food Planning

Tracks the consumption and wastage of food thus reducing the wastage of food.

User defined rules

Restriction in time slots for food booking, food cancellation, event timings

Canteen Guest Management

Manages Guest information, allows to book food for the guest by the Employee with approval from the approving authority.

Advanced Booking Facility

Food can be booked in advance with required quantity

Cashless transactions

Cashless transactions at the canteen counter with salary debit facility. The information flow from application to HRMS module is seamlessly integrated

Audit Trail Log

All user activities are recorded for reporting purposes.

Comprehensive Reporting

 $Enables \ to \ view \ countless \ reports \ of \ food \ consumption \ for \ different \ categories \ like \ Employee/Guest/Department/Vendor.$

Dynamic Reporting

Creates customized canteen reports such as:

- Simple Drag and Drop interface
- Multi level field search
- Report Emailing and scheduling
- Report sharing with multiple users
- Data visualization of all transactions

Self Service KIOSK

Solus self-service KIOSK is an innovative solution for an easy-to-operate food ordering system for Employees in an organization. The KIOSK greatly helps the Employees in accessing the Canteen services in the organization without getting in long queues.
