

Solus Visitor Dual Printer Kiosk

Architecture Diagram

Introduction

Solus Visitor dual printer KIOSK is designed to guide visitors through an easy-to-operate registration and sign-in process, for both new walk-up or existing pre-registered visitors. The self-registration KIOSK works as a super-efficient receptionist, makes it fast and provides comprehensive Visitor registration, reporting and badge printing. The KIOSK comes with an inbuilt webcam, a biometric reader and a preloaded OS that guides your visitors perfectly through the process by which they obtain an OTP reference code sent to their registered mobile number which can be later shown to the security/ receptionist for further processing.

KIOSK Features

- Self Service Visitor registration, sign in and management.
- Email notifications on lack of print roll paper.
- Provides pre-registered and walk-up visitor support.
- Visitor enrolment with photograph, signature and biometric information.
- Automatic email/SMS notifications to Hosts and Visitors.
- All in one unit KIOSK which includes web camera, barcode scanner, QR code scanner & biometric reader and Badge/ Pass/ Token Printer.
- Customizable as required.

KIOSK Benefits

- Hassle-free self-check-in of Visitors.
- Improves efficiency of the Visitor check-in and check-out process.
- Make the Visitors feel secured.
- Reduce cost or free up reception staff for Visitor meet.
