SOLUS Boom Barrier – S DBA Series

S SDB - 600

S SDB - 900

Solus Boom Barriers

Combination of Reliability, Performance and Elegant looks, Solus Boom Barriers are fitted with high quality maintenance free, powerful electro mechanical AC driven mechanism. Forming a core part of barrier this drive mechanism and motor base is Precision Die casted with aluminum alloy. This mechanism along with balanced spring provides soft, no noise & no jerk operations even in intensive usage. This also ensures prolonged working life for Barrier.

Boom Length can be chosen from 2 to 6 meters, accordingly the barrier closing time varies from 2 to 4 seconds. They can be conveniently installed at right or left hand side of Vehicle entrance. A manual clutch option is provided to open the Boom Barrier in power outage situations.

Key Features:

- 2 to 6 meter length. 1 second Per Meter Opening, Closing time.
- No maintenance, No noise motor.
- Key & Hand Clutch options for manual operation.
- Dual Boom limiting methods.
- Integrable with LED signals & Time display units.
